THE GLORY FERN (Adiantum Farleyense Gloriosa)

## DREER'S FINE FERNS

### VARIETIES OF SPECIAL MERIT

#### Adiantum Croweanum.

We are the sole distributors of Mr. Crowe's stock of this valuable fern.

This for many years has been the standard variety for general commercial work. We have a nice lot of 3-inch pots. \$2.00 per doz.; \$15.00 per 100; \$140.00 per 1000.

ASPLENIUM NIDUS AVIS (Bird's Nest Fern)

#### Adiantum Hybridum.

Preferred by some growers to A. Croweanum. A large thrifty stock of 2 1/4-inch pots. 85 cts. per doz.; \$6.00 per 100; \$50.00 per 1000.

#### Adiantum Farleyense Gloriosa.

##### The Glory Fern or Ruhm von Mordrecht.

This variety has proven a most valuable addition for the grower of choice fronds for cutting purposes. It closely resembles Adiantum Farleyense and will make a splendid substitute for that fancy variety and it can be produced at much less cost, as it will thrive under conditions in which Adiantum Farleyense could not exist.

Anyone who successfully grows the ordinary varieties of Adiantum such as Cuneatum, Croweanum and Hybridum, can grow it under precisely the same conditions given to these sorts.

3-inch pots, \$1.50 per doz.; \$10.00 per 100.

##### The Crested Holly Fern.

A most important addition to our list of Ferns. Its foliage is of a rich, deep, glossy green color, the pinnae or leaflets besides being wavy or undulated are also deeply cut or toothed, giving the plant a graceful light appearance, which makes it valuable not only as a dish Fern but for decorative work and apartment use.

CYRTOMIUM ROCHFORDIANUM

PTERIS WILSONI (Crested Fern)

## DREER'S FINE FERNS—Varieties of Special Merit

—CONTINUED—

### Nephrolepis John Wanamaker.

A "sport" from *Nephrolepis Scholzelii*, with longer, narrower, gracefully drooping fronds. It is not so compact in growth as *Scholzelii*, and, therefore, does not decay in the center, and is a durable house fern. It is a rapid grower, making an abundance of fronds, and is quite distinct from any other *Nephrolepis*.

Strong Plants from 2½ inch pots—for delivery in August.

\$3.00 per dozen, \$20.00 per 100, \$150.00 per 1000.

The following ready for delivery October 1st.

4 inch pots, \$50.00 per 100; 6 inch pots, \$1.00 each.

8 inch pots, \$2.00 each; Specimens in tubs, \$5.00 each.

### Nephrolepis Elegantisima Improved.

### Pteris Childs.

This beautiful variety is to *Pteris* what *Farleyense* is to *Adiantum*, and like that variety produces no spore, so that propagation is by the rather slow method of division, which will keep it a rare variety. The plant is of strong growth, attaining a height of about 20 inches; fronds large, pinnae deeply dentated and undulated, tips crested. Makes a beautiful specimen for exhibition.

Fine plants, 4-inch pots, 50 cts. each.

### Polypodium Mandaianum.

This beautiful Fern originated as a seedling of *P. Aureum* and is similar in habit of growth to its parent, producing on well-grown plants fronds from 2 to 3 feet long, on which all of the pinnae are beautifully fringed or laciniated; entirely distinct from all other varieties. It makes a handsome specimen grown either in a pot or a hanging-basket.

Fine plants in 6-inch pots . . . . . \$2 00 each

NEW FRENCH HYDRANGEA

## Latest Introductions in French Hydrangeas

### Novelties for 1915

It seemed impossible that further improvement could be made on the new varieties of Hydrangeas sent out during the past few years; however, the latest novelties imported by us from various specialists in Europe during the past two seasons, and which we have thoroughly tested, show a wonderful advance. We have selected twelve varieties which we now offer.

**Baby Bimbenet.** Very dwarf, free and early, the plant becomes covered with large compact trusses of silvery-rose flowers.

**Beaute Vendomoise.** Immense heads of white flowers tinted pink; the individual florets will attain a diameter of 4 inches; while it shows a tendency to a loose open truss, this adds to its attractiveness. We feel very enthusiastic about this sort.

**Directeur Vuillermet.** A strong grower with very large fringed flowers of bright rose with greenish tint, very effective.

**Eclairer.** One of the most startling acquisitions, a very bright carmine-rose, the nearest approach to a red. We particularly recommend this.

**La France.** Very strong grower, with immense trusses of deeply fringed flowers of a delicate shade of rose.

**La Perle.** The grandest, largest and most refined white we have yet seen; flowers deeply fringed.

**Lille Mouillere.** An ideal deep pink variety of splendid habit and very floriferous.

**Louis Mouillere.** Has the vigorous growth of Otaksa, very large fimbriated flowers of a delicate lilac rose.

**L'Islette.** Immense flowers of a bright carmine-rose.

**Mme. Auguste Nonin.** Heavy strong growth with large delicate rose-colored flowers

**Souvenir du Lieut. Chaurc.** Produces immense heads of bright rose-carmine flowers on bold upright stems.

**Ville de Chartres.** Immense large heads of purest white.

Good young plants from 2-inch pots \$2.00 per doz.; \$15.00 per 100  
The set of 12 varieties for \$2.00.

### Hydrangeas for Easter Forcing.

Easter 1916 coming very late (April 23) Hydrangeas will be particularly useful as they may be brought on very slowly which will assist in their more perfect development and help their keeping qualities, which, in a late Easter when the weather is likely to be warm is an important consideration. Anticipating a heavy demand we are preparing an immense stock of all the leading varieties in 5 and 6-inch pots which we offer for October and later delivery.

These are all field-grown plants which have been potted into 5 or 6-inch pots (according to the growth of the variety) during the winter months.

# POT-GROWN HARDY PERENNIALS

We will carry the following varieties in pot-grown plants throughout the summer in such condition that they can be planted at any time. This is a good stock to keep in mind, as it frequently happens that summer plantings are required to cover failures and misses in other stocks. Many of these varieties will still give an account of themselves and make a good showing this season, while all, if planted now, will be in fine shape for next year's flowering.

## Dreer's Superb Mixture of Single Early Tulips

There are great differences in the various grades of mixed Tulips. As a rule they are made up by the growers in Holland out of cheap, undesirable or surplus lots, and little attention given to variety of color or time of flowering.

We import each season a large quantity of selected bulbs of the best-named varieties to make this superb mixture. It contains a carefully balanced range of colors, and must not be compared with mixtures as usually sent out, and notwithstanding the great care to make this the finest mixture ever sent out we are in a position to offer it at the price usually charged for a very inferior grade. \$1.00 per 100; \$8.00 per 1000.
